EDUCATION

Aditya College of Engineering and Technology, Surampalem **October 2022 – Present**
Bachelor of Technology in Computer Science and Engineering – CGPA: **7.89**/10 *Surampalem, Andhra Pradesh*

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript
Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks
Backend Development: Spring Boot, RESTful APIs, Microservices
Databases: MySQL, MongoDB, DynamoDB
Cloud & Infrastructure: AWS (EC2, S3, Lambda, IAM, CloudWatch), Linux
Developer Tools: Git, GitHub, IntelliJ IDEA, Bash, VS Code

EXPERIENCE

SmartBridge Educational Services Pvt. Ltd **June 2025 – July 2025**
Generative AI – Intern *Remote, Andhra Pradesh*

- Developed Python-based Generative AI pipelines on IBM Cloud to preprocess and analyze 50K+ records.
- Evaluated 12+ datasets to enhance data quality and improve baseline model accuracy by 18%.
- Engineered reusable Python preprocessing pipelines, reducing repeated data-cleaning effort by ~30% across experiments.

Technical Hub Pvt. Ltd **June 2024 – June 2025**
AWS Development – Intern *Surampalem, Andhra Pradesh*

- Deployed and monitored AWS infrastructure (EC2, S3, IAM, CloudWatch) supporting 5+ applications.
- Automated cloud configuration using Python/Bash scripts on Linux, reducing manual setup effort by 25%.
- Configured CloudWatch metrics and alerts to track backend performance and system health.

PROJECTS

User Access & Workflow Backend | Java, Spring Boot, MySQL **January 2026 – Present**

- Engineered 10+ secure REST APIs implementing role-based access control for user and workflow management.
- Architected layered Spring Boot backend with validated CRUD operations, improving maintainability by ~25%.

Automated Expense Processing System | AWS S3, Textract, Lambda, SES **August 2025 – September 2025**

- Designed serverless OCR pipeline using Textract and DynamoDB to process 100+ expense receipts.
- Automated validation workflows using AWS Lambda, reducing processing failures by ~40%.
- Enabled scheduled expense reporting via Amazon SES, eliminating 80% of manual tracking effort.

Feature Flag Engine with Redis Caching | Java, Spring Boot, MySQL, Redis **October 2024 – November 2024**

- Built feature flag engine supporting global toggling and percentage rollout via deterministic bucketing.
- Implemented Redis caching with TTL and eviction, reducing database load and improving response latency.

ACHIEVEMENTS

- Solved 600+ Data Structures and Algorithms problems across LeetCode, CodeChef, and GeeksforGeeks.
- Attained peak LeetCode contest rating of 1502 and CodeChef 2-Star rating through competitive programming.
- Earned 5-Star ratings in C++ and Java on HackerRank by solving advanced algorithmic challenges.
- Competed in 10+ coding contests and hackathons on GeeksforGeeks and Unstop.

CERTIFICATIONS

- AWS Certified Developer – Associate
- Red Hat Certified System Administrator (RHCSA)
- Cisco CCNA v7 – Introduction to Networks
- Java IT Specialist (Pearson)
