EDUCATION

Aditya College of Engineering and Technology, Surampalem

October 2022 – April 2026

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.0/10

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript

Backend Development: Spring Boot, RESTful APIs, Microservices

Cloud & Infrastructure: AWS (EC2, S3, Lambda, IAM, CloudWatch), Linux

Databases: MySQL, MongoDB, DynamoDB

Core CS: Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

Developer Tools: Git, GitHub, IntelliJ IDEA, Bash, VS Code

EXPERIENCE

SmartBridge Educational Services Pvt. Ltd

May 2025 – July 2025

Generative AI Intern

Remote, Andhra Pradesh

- Built Python-based data pipelines on IBM Cloud to process and analyze 50K+ records efficiently.
- Improved baseline model performance by 18% through structured dataset validation and preprocessing.
- Designed reusable preprocessing workflows, reducing redundant data-cleaning effort by ~30%.

Technical Hub Pvt Ltd

June 2024 – June 2025

AWS Development Intern

Surampalem, Andhra Pradesh

- Managed AWS infrastructure (EC2, S3, IAM, CloudWatch) supporting 5+ applications in test environments.
- Automated environment setup using Python and Bash scripts on Linux, cutting manual effort by 25%.
- Implemented monitoring and alerting via CloudWatch to track system performance and reliability.

PROJECTS

Assignment Integrity Analyzer | Python, FastAPI, MongoDB

December 2025 – March 2026

- Developed embedding-based similarity system to detect copied or paraphrased assignments across 50+ submissions.
- Designed pairwise comparison pipeline generating similarity matrices and classification logic for flagged cases.
- Optimized FastAPI endpoints and MongoDB queries for submission storage, analysis results, and violation tracking.

Automated Expense Processing System | AWS S3, Textract, Lambda, SES

August 2025 – September 2025

- Built a serverless OCR pipeline using AWS Textract and DynamoDB to process 100+ expense records.
- Implemented Lambda-based validation workflows with retry handling, reducing processing failures by ~40%.
- Automated reporting via Amazon SES, eliminating ~80% manual effort in expense tracking.

Feature Flag Engine | Java, Spring Boot, MySQL, Redis

October 2024 – November 2024

- Developed a feature flag system enabling runtime feature toggling and percentage-based rollout using deterministic hashing.
- Reduced database load and improved response latency using Redis caching with TTL and eviction strategies.

ACHIEVEMENTS

- Solved 600+ Data Structures and Algorithms problems across [LeetCode](#), [CodeChef](#), and [GeeksforGeeks](#).
- Attained peak LeetCode contest rating of 1502 and CodeChef 2-Star rating through competitive programming.
- Earned 5-Star ratings in C++ and Java on HackerRank by solving advanced algorithmic challenges.
- Competed in 10+ coding contests and hackathons on GeeksforGeeks and Unstop.

CERTIFICATIONS

- AWS Certified Developer – Associate (Amazon Web Services)
- Red Hat Certified System Administrator (RHCSA)
- Cisco CCNA v7 – Introduction to Networks
- Java IT Specialist (Pearson)
